

Acquiring partners and payment methods

February 2016

**Accept more payments at home and abroad.
To increase your revenues you don't need to be
an expert in payment methods.
That's where we come in...**

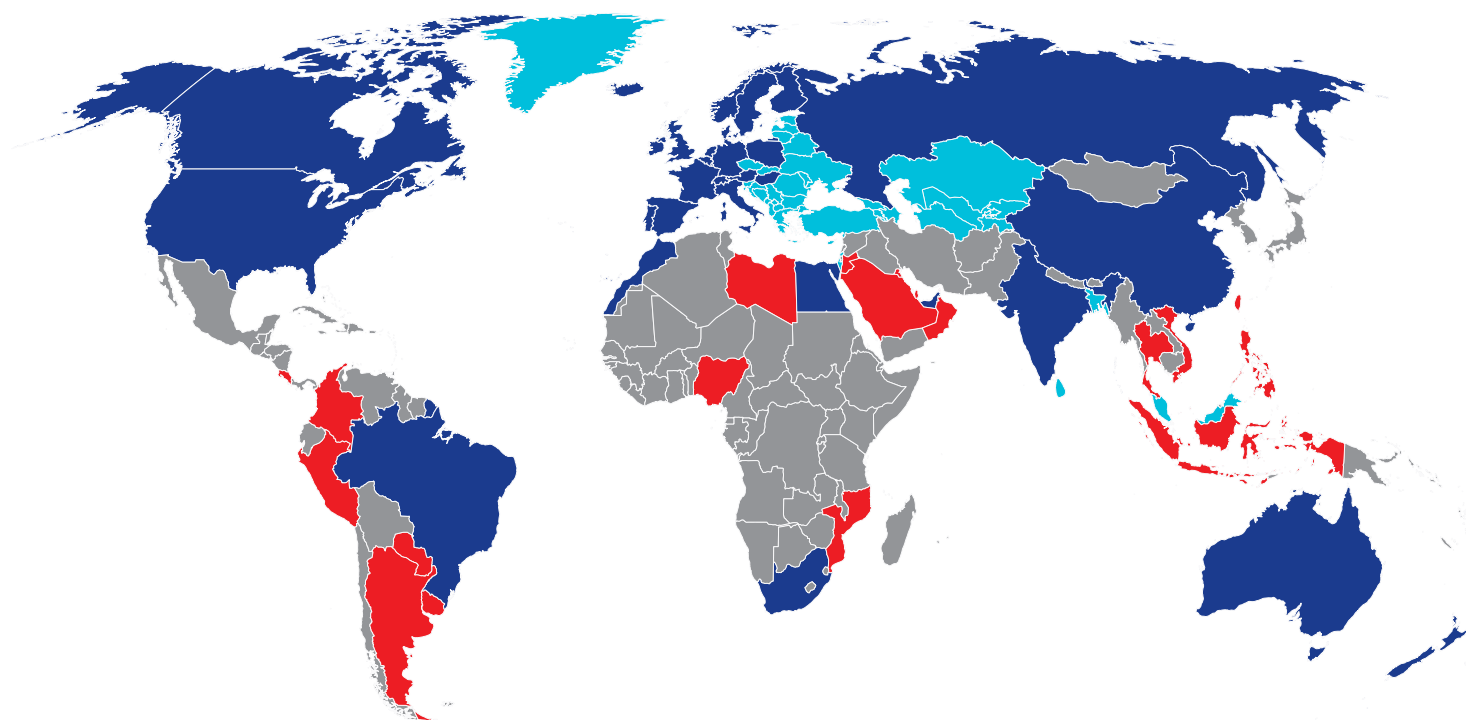

In order to offer an optimal flexibility to our merchants, Ingenico ePayments constantly enlarges its coverage of acquirers and payment methods.

Over the years we have developed local partnerships with card and payment method acquirers to cope with the varying payment patterns across the different countries.

With SEPA (Single European Payment Area) in Europe and the increasing maturity of the e-payment industry, we also work with acquirers that can cover several countries on a European basis.

With coverage and expertise in over 120 countries, Ingenico ePayments is a natural partner to help you deliver on your expansion strategy – in your home market and outside your borders.

- One local and European acquiring connection or more
- Coverage by one European acquirer or more
- Accessible through existing processor
